

1 **Supplemental Information**  
2 **for**  
3 **372-040 or AHH5442 Wire Mesh Air Filter Element**  
4 **(Coopers Type)**

5 **MGA**

6 **Can be used in Burgess Filter Housing on BN1, BN2, early BN4**

7  
8 This air filter element (Fig 1) is a  
9 reproduction of the wire mesh filters  
10 made by Coopers. They were used  
11 in the MGA as well as other cars.

24 The Austin Healey BN1, BN2 and early BN4 also used a wire mesh filter assembly (1B2732, 1B2733)  
25 made by Burgess, not Coopers. The element (Fig 2) had an inner and outer layer of mesh screening,  
26 and the space between the two screens was filled with copper wool. There was a top & bottom plate  
27 which had a rubber seal in a groove that pressed against the top and bottom of the air filter assembly.  
28 The Burgess filters and the elements for them have been unavailable for many years. The 372-040 filter  
29 element will fit into the Burgess housing, and makes a reasonable vintage looking replacement.

30 Those interested in upgrading to a  
31 modern air filter should consider using  
32 the K&N element we offer for the MGA  
33 under 222-928. That filter will fit between  
34 the Burgess top and bottom plate (see  
35 Fig 3,4), but there will not be room for the  
36 outer metal screen. As you can see in the  
37 picture, the K&N filter looks like it was  
38 made for the Burgess housing. For more  
39 information on that option, please look up  
40 222-928 on our website.
