

**Supplemental Information & Instructions
for
408-285 Stud, Windshield Side Support (upper)
408-295 Stud, Windshield Side Support (lower)
MG TC, TD, TF**

About these studs....

The upper stud 408-285 (1a) is a little longer at 1 3/8" overall than the 408-295 (1b) lower stud, which is 1 1/4" overall. The lower stud (1b) is distinguished by the flat on one side. They are made for us in small batches by a specialty hardware supplier in England. Given the limited demand for these, we are grateful that they are still available. The threads are 5/16 British Standard Brass, a Whitworth threadform.
