

# 454-231 & 262-340 Steering Wheel Center Hub

## Installation Instructions

### For: MG TD & TF

440 Rutherford St. Goleta, CA 93117  
1-800-667-7872 • FAX 805-692-2525 • [www.MossMotors.com](http://www.MossMotors.com)

#### Tools required:

- Phillips screw driver
- Flat file

Sometimes the center cap does not fit the steering wheel correctly. If you find a large gap on one side of the cap and a small gap or none at all on the opposite side, follow these simple instructions to even things out.

1. Remove the center cap from the steering wheel.
2. File some metal away from the area shown. It doesn't take much.

**Illustration 2**

3. Test fit the center piece and install the screw. If the gap has evened out, you are done. Make sure the screw is tight. If the gap is still uneven repeat these steps until the cap evens out.
