MOSS CLASSIC JAGUAR

INTO THE FUTURE

For decades, classic British cars have captivated enthusiasts with their timeless elegance and undeniable charm. This didn't happen without a lot of effort by a lot of people.

Restoration, the art of bringing these vintage vehicles back to their former glory, is key of preserving their legacy. And the dedication and attention to detail involved in the restoration process not only upholds the historical significance of these automobiles but also honors the craftsmanship of their original creators, too.

Reliability, a crucial concern for any vehicle, has seen significant advancements in the realm of classic British cars. With technological innovations and the

availability of modern materials and engineering, our beloved classics are being rejuvenated with enhanced performance, safety, and durability without compromising their authentic character. This blend of tradition and innovation enables enthusiasts to enjoy the driving experience of yesteryears with a newfound reliability that we've come to expect today. Driving a classic British car is more than just a means of transportation; it's an effort to experience motoring elegance. The thrill of gripping the steering wheel that probably isn't power assisted. Listening to the hum of the engine and knowing what the different sounds mean from under the bonnet. Each journey celebrates the craftsmanship, style, and the

sheer joy of driving a timeless motorcar.

The future of classic British cars rests on you. It's your passion and dedication that's preserving these automotive icons, and each one of us here at Moss Motors is grateful of your commitment to maintain not only the cars but also the community that enjoys them. A community intent on passing on the torch of automotive enthusiasm to future generations.

As time marches forward, the legacy of classic British cars shines bright. Embracing the future while honoring the past, our cars remain a timeless symbol of automotive excellence.

**Enjoy the ride,
Moss Motors**

FEATURED PRODUCT

XJS Auxiliary Cooling Fan Kit by Revotec

New from Revotec is a replacement for the now obsolete C38009 XJS auxiliary cooling fan, which is activated when the A/C runs or extra cooling is required. Supplied with a higher performance and waterproof fan, this kit fits all earlier applications with the four-blade (as opposed to "swirl") fan and includes a new alloy shroud complete with new flaps and a powder-coated finish. Brackets, self-drilling fixtures and a connection kit are also included. Bring the quality and peace-of-mind of Revotec products to your XJS cooling system.

DYNOLITE

EUROPE'S CLASSIC MOTOR OIL

Brake Fluids by Dynolite

Dynolite Brake Fluids prioritize quality and safety. DOT 4 is a premium polyethylene glycol blend with a minimum dry boiling point of 500 F, exceeding industry standards. It has excellent lubricity, a firm pedal feel, and works well with rubber parts. DOT 5 is a non-hygroscopic, non-corrosive silicone brake fluid, making it ideal for historic vehicles. It maintains a boiling point of 500 F throughout its life and has an operating range of -58 to 500 F. DOT 5 does not mix with glycol fluids, so it is best to convert during a total brake system overhaul.

DOT 4 - 500 mL	220-403	\$9.99
DOT 5 - 1 L	220-413	34.99

FEATURED

MODERN SOUND FOR YOUR CLASSIC

HEAD UNITS

Vintage Style Radios by RetroSound

RetroSound radios deliver superb sound and the latest audio features without compromising the original style of your dash. We carry a variety of their head units so you can choose the perfect solution for your audio needs.

RetroRadio

The RetroRadio looks like your vehicle's original factory radio while adding all the modern audio features found in your daily driver. Classic push-buttons, replica knobs, and a period-correct bezel or faceplate combine with the radio's display to create a truly authentic look.

Europa

The Europa Radio is designed to replicate the look of the original, complementing the interior style of your classic car while updating audio technology. A new Din Kit is included for an easy installation.

Grand Prix

The RetroSound Grand Prix perfectly compliments the interior styling of the 1980s while updating the audio technology to today's standards. A new Din Kit is included for an easy installation.

RetroRadio

Two-piece set, cup extra

Cup Holder Pair, Series III XJ6

This two-piece set is a new item for Series III XJ6 sedans. By removing your ashtray inserts and replacing with this kit, you'll have individual cup holders for driver and co-pilot. The inserts employ a simple one-handed adjustable slider to suit everything from a 4 1/2" tankard to a 2 1/2" demi-glass. Each unit secures to the console with the two screws formerly used to hold the ashtray assemblies in place.

Cup Holder Set 37-3692 \$59.99

Union Jack Tax Disc Holder

In the UK, tax documents were stowed in windshield-mounted stickers that incorporated a small pocket. While never used on USA-specification cars, they add a bit of home-market flair to your favorite British car.

Union Jack Tax Disc Holder 37-1031 \$5.99

Under-Bonnet Insulation Kit

This is an aftermarket kit cut from 1/2" foam rather than the original fiber board. It contains foam replicas of BEC22723 and BEC22724, the large and small insulation pieces.

XJ6 & XJ12 Ser. II & III BEC22723/4 \$189.99

3M Brand Weatherstrip Adhesive

This is the best product on the market for gluing weatherstrip to sheetmetal. This is the black version rather than the more common yellow.

Trim Adhesive 38-9900 \$26.99

Two-Piece Walnut Burl Shift Knob

Jaguar has long been known for sumptuous interiors, but the two-piece black plastic shift knob fitted to Series I, II and III XJ6/XJ12 and most XJS didn't quite measure up. This beautiful two-piece walnut burl knob set is what Jaguar should have fitted from the outset.

Two Piece Burl XJS all, XJ6 (to-88) 37-0298 \$59.99

Grand Prix Radio by RetroSound

The RetroSound® Grand Prix perfectly compliments the interior styling of the 1980s while updating the audio technology to today's standards. The unique design of the Grand Prix features authentic paddle-style controls along with low profile push-buttons and a 32,000 color digital display. The Grand Prix is the perfect solution for updating the audio in your classic. A new Din Kit is included for an easy installation.

The Grand Prix is currently features an AM/FM tuner with 30 presets powered by a built-in 300-watt (peak power) amplifier at a TrueRating™ of 25 watts RMS x 4 channels. It includes a rear auxiliary input, Built-in Bluetooth® connectivity (microphone included), a rear-mounted USB port, dual RCA pre-outs, and a 32,000 color display. Assembly required.

Includes:

- DIN Kit
- AM/FM tuner with 30 presets
- Built-in 300-watt (peak power) Mosfet amplifier
- 25 watts RMS x 4 channels - TrueRating
- Rear-mounted auxiliary input for portable devices
- Built-in Bluetooth® connectivity
- Bluetooth® microphone included
- Rear-mounted USB port for flash drives and other devices
- Dual RCA pre-outs for external amplifiers
- 32,000 color display

Grand Prix Radio 230-378 \$305.00

Seat Belt Guide

This clever guide keeps your seat belt strap properly positioned over your shoulder instead of chafing against your neck or slipping down the seat, eliminating twisted and tangled seat belt. It is made of tough but flexible black UV-resistant plastic. Install it by removing your head rest and simply sliding it on for a friction fit, no tools required. The guide can also be modified for snap-on installation if your head rest is frozen. Fits all single-post headrests. Sold by the pair.

Seat Belt Guide 222-198 \$36.99

RetroBelt®

Seat Belts by RetroBelt

These RetroBelt original equipment-style lap belts come with chrome push-button buckles that feature a starburst design and webbing color-matched to its stitching. Available as a standard belt or with an inertia locking retractor, these meet or exceed Federal Motor Vehicle Safety standards. Priced individually, an economical solution to your seat belt needs.

INTERIOR

Steering Wheels by Tourist Trophy

Tourist Trophy offers a complete selection of wood and leather steering wheels for most British cars. Made to the highest standards, these use aluminum frames for lightweight strength.

With options including wood, leather, spoke style, and several different widths, you can easily personalize the look and feel of your car's interior with these classic steering wheels. Because the wood is unique to every piece, final stain color and grain patterns may vary. Adapter hub sold separately.

Leather Look Sound Barrier by DEI

Leather Look Sound Barrier is a great way to significantly reduce troublesome incoming sounds while providing thermal insulation to lessen transfer of heat and cold in any climate. It is designed to insulate any area of your vehicle's interior where a leather appearance would provide a finishing touch. You can use it on a headliner, on rear decks, door skins, trunk floors, floor boards, speaker boxes, or on engine covers etc.

This sound barrier can be permanently installed with Hi-Temp Spray Adhesive or used as temporary protection in trunk and floor areas. With a moisture resistant, black leather embossed surface, it also features a 1 lb/sq ft loaded barrier. Available in two sizes: 8 sq ft and 16 sq ft. Take your pick!

Features:

- Stylish finished appearance
- Enhances stereo performance and sound
- No mold or mildew issues

24" x 48" - 8 sq ft	231-980	\$121.99
48" x 48" - 16 sq ft	231-981	241.99

- Maximum noise control
- Quiet and comfortable interior

Dynamat Installation Roller

This is a top quality tool that will last for years. Add one to your tool box today!

Dynamat Roller	37-3603	\$27.49

Black Floor & Tunnel Shields by DEI

Block engine and exhaust heat with the new Black Floor & Tunnel Shield by DEI. Backed with a high temperature pressure-sensitive coating, looks great while protecting components from damage. It can withstand up to 1750 F while the adhesive side can hold past 450 F. Constructed with an embossed 10 mil aluminum face bonded to 1/8" composite glass-fiber core, it is very flexible and can easily shape to firewalls, trans-tunnels, floors, and more. Easy to install. Available in two sizes: 48" x 21" and 48" x 42". We highly recommend this heat shield for your car!

Features:

- Proprietary high-temperature black coating
- Wind & water will not affect adhesive
- Minimum clearance required, only 3/16" thick
- Easily shape, trim, peel & stick
- Aggressive self-adhesive backing

48" x 21"	231-975	\$155.99
48" x 42"	231-976	299.99

Boom Mat Moldable Noise Barrier by DEI

Boom Mat Moldable Barrier is an easy-on-the-budget noise-control solution. This highly flexible, 0.5 lb/ft2 mat by DEI has a thin profile and acts as a sound and moisture barrier. It conforms to the shape of your chassis, and for more intricate areas can be molded with a heat gun as the material bonds where seaming is necessary. All of these qualities make it perfect for a sound and moisture barrier behind door panels. Available in two sizes.

Features:

- Only 1/16" thick
- Easy installation
- Cost effective sound and moisture barrier
- Custom molded fit with heat application
- Easy removal for repairs or service
- Waterproof properties
- Perfect for replacing craft paper or plastic door moisture barriers

Jaguar Leaper License Plates

These American-made Jaguar logo accessories are of excellent quality. If you're looking for something appropriate for a Jaguar, and not what you'll find at the local chain parts store, this is it. Plates come with screws, washers, and nuts.

These Mini Plates measure 4" x 12" with the same hole spacing as a full size plate. When attached to the front bumper, this makes for a sleeker appearance.

Jaguar Stainless License Plate Frame

An official Jaguar part, this plate frame is made of heavy stainless steel and polished to a high luster. The use of nonferrous fasteners and washers ensure the finish will remain beautiful for many miles.

Jaguar Plate Frame C2A-1173JAG \$44.89

License Plate Frames

Most license plate frames that auto parts store are, well, junk, to be frank. Our made-in-the USA stainless-steel frames are available in a variety of finishes and styles and feature crisp lines and a nice heft. All frames include matching hardware-hider caps. It's time to treat your Jaguar to the best.

Two Hole, Polished Stainless Steel 37-9085 \$39.99

Nondescript Plate Frames

For the discerning owner who wishes not to advertise but, rather just have a nice plate frame. Made from heavy gauge stainless steel, polished smooth and available now.

Polished Stainless Slimline Frame - Each 37-9074 \$39.99

CAC3914/1

CAC9820/1

Kent Style Wheel

The iconic "Kent" wheel is finally available once again! Now, there is no need to attempt to refinish a worn-out original. While there were several versions of the Kent wheel, this is the earlier one, and as many would argue - the most attractive one. It is mostly powder-coated polished alloy with just the lug-nut recesses painted dark grey. As fitted to late Series II XJ6, Series III X6, and early XJS, these beautifully finished wheels are supplied with a non-original plastic center cap. We recommend purchase of CAC9820/1, the original cap with a pre-installed emblem. Wheels are German TÜV approved.

Specifications:

- Design: XJS
- Color: anthracite/diamond cut lip.
- Size: 6 in x 15 in

- Bolt circle: 5 x 120, 65 mm
- Offset: 35 mm
- Centerbore: 73, 9 mm

EXTERIOR

XJ6 Engine Fasteners by ARP

The time and expense required to rebuild a Jaguar six-cylinder engine justify the use of only the best internal components. When it comes to engine hardware, ARP-brand fasteners are the world standard. They're used by top race teams in virtually every form of motorsport. For XJ6 Series I, II and III engines, we offer ARP-made rod bolts and nuts (they're all we sell, actually), a main bearing stud, nut and washer kit or a convenient kit that combines both the rod and main bearing cap hardware. Kits are supplied with ARP's proprietary thread lubricant.

Chrome-Moly Valve Spring Retainers, XJ6, XJ12, and XJS V12

Stronger and lighter, these chrome-moly performance valve spring retainers have other advantages as well. Their precise manufacturing eliminates the tendency for the retainer to ride up over the keepers, lifting the valve shim off the valve, allowing the possibility for all sorts of calamity. These are a must for high rpm/race applications, and advised for any street overhaul as well. These retainers are suitable for all XK engines from 1948-1987. They allow fitment of valve stem seals to pre-1969 engines as well. For all 4.2-liter six cylinder and 5.3-liter V-12.

Performance Valve Spring Retainers, Each C27480	\$7.89
---	--------

Special Valve Springs

After you've selected the proper cam for your application, you need to ensure the rest of the valve train will be up to the task. These springs eliminate float and "bounce" at high rpm, resulting in constant power delivery. Our springs can be used with any of the cams listed in this catalog and must be used with our high performance cams. Order two sets for a V-12.

High Performance Valve Spring Set	37-1113	\$94.99
-----------------------------------	---------	---------

Tappet Guide Hold-Down Kit, XJ6

A correctable weakness in the XK Jaguar cylinder head is tappet guide movement. Under the stress of high rpm, racing applications, or even with just a lot of miles, the tappet guides can work loose. These guide hold-downs are the ounce of prevention needed to hold the guides in place. Complete set as shown, top. The inset photo above illustrates the placement of the hold-down.

Tappet Guide Hold-Down Set	37-1580	\$114.99
----------------------------	---------	----------

High-Performance Crankshaft Damper, XJ6

Manufactured specifically for the Jaguar engine. Each unit comes accurately marked 0-40 degrees for precise timing. Damper is supplied pre-drilled to accept standard Jaguar crank pulley. Ideal for racing and street engines where smoothness and reliability are important.

Vibration Damper

37-8522	\$499.99
---------	----------

Large Diameter Tappet & Tappet Guide Set

Typically a billet cam has a lobe wider than the standard tappet diameter. By machining the head to accept the larger diameter steel tappet guide set the engine builder can then install these larger diameter tappets. For 6-Cylinder engines only.

Large Tappet & Guide Set	37-3589	\$1,249.99
--------------------------	---------	------------

V-12 Cylinder Liner Hold-Down Set

Not something you'll need every day, but if you work on Jaguar V-12s, this set of cylinder liner hold-downs is essential. Made by a small shop in the USA. Quality is excellent with .125" tubing retained by 1/8" x 1" steel pins.

Liner Hold-Downs

JD.41

\$599.99

Oil Pump Drive Coupling

This item couples the oil pump drive gear to the distributor and is a critical wear item. Made in the UK. For all Series I, II and III XJ-6.

XJ6 1969-87

C8648

\$39.99

Braided Stainless Steel Cam Oil Feed Line

This braided, flexible line assembly replaces the standard solid line that is prone to fatigue cracks (with potentially disastrous results) and persistent leaks. This flex line will not crack and adds significantly to the under-bonnet cool factor. Supplied with copper washers. New banjo bolts, part CO-5846, available separately (3 reqd). Fits all Series I and II XJ6. Does not fit Series III XJ6.

Cam Feed Lines

37-3553

\$89.99

Valve Shim Kit

All neatly arranged in a compartment box are three each of shim sizes 0.085 to 0.092; four each of sizes 0.093 to 0.103 and three each of sizes 0.104 to 0.124. 130 shims in total. All shims are made with either part number (standard A-Z range) or size (0.111 to 0.124) laser etched on shim.

Shim Kit

21-1272

\$699.99

Monza Oil Filler Cap

While you may not need to save precious seconds during a pit-stop, this chrome-plated brass cap imparts a nice vintage-race feel to any engine compartment. With the included double-threaded insert, it attaches to any threaded six-cylinder valve cover through late Series II XJ-6.

Monza Oil Filler Cap

37-1599

\$179.99

ZDDPlus Engine Oil Additive

After 70+ years of trouble-free, metal to metal engine protection, the E.P.A. is forcing ZDDP (Zinc Dialkyl Dithio Phosphate = Zinc and Phosphorus) out of domestic motor oil. If your engine was designed prior to the 1990s, your non-roller lifters require ZDDP in your motor oil to avoid premature deterioration. Don't let your lifters run metal-to-metal. Add the 4 fluid ounce contents of this ZDDPlus bottle at every 4 to 5 quart oil change. Not for use with catalytic converters.

ZDDPlus, each

220-805

\$16.99

Hi-Flow Oil Pump, XJ6

This oil pump has been modified to provide 30% greater flow than a standard 4.2 liter pump. This resultant flow and pressure increase is ideal for vintage race and high performance applications of the XK engine.

For 3.4 and 3.8, also order the required adapter sleeve (#21-0215).

Adapter Sleeve

21-0215

Manual Override Switches by Revotec

Revotec now offers a variety of switches to manually control your Revotec Fan Controller. Available as a 3-way rotary switch with On, Off, or Automatic positions or as a 2-way Jaguar style toggle switch with On or Automatic. Each switch is supplied with a mounting bracket, wiring, decals, and hardware.

3-Way Rotary	231-725	\$69.99
2-way Jaguar-Style	231-726	49.99

Electronic Fan Controller by Revotec

The Revotec Electronic Fan Controller is revolutionary compared to probe-type or surface-mount switches. Because the controller is firmly mounted in a radiator hose, it instantly measures what matters: the temperature of the coolant and not the surface temperature of the radiator. Installation is simple, it does not restrict coolant flow, and the controller is fully adjustable from 158-248 F (70-120 C) with the turn of a screw. It's compatible with all DC fans and available to fit a variety of sizes. If you're building an electric cooling fan system, there is no better controller than the Revotec Electronic Fan Controller. Listed sizes refer to the hose I.D.; a relay and all necessary fittings included

XJS Auxiliary Cooling Fan Kit by Revotec

New from Revotec is a replacement for the now obsolete C38009 XJS auxiliary cooling fan, which is activated when the A/C runs or extra cooling is required. Supplied with a higher performance and waterproof fan, this kit fits all earlier applications with the four-blade (as opposed to "swirl") fan and includes a new alloy shroud complete with new flaps and a powder-coated finish. Brackets, self-drilling fixtures and a connection kit are also included. Bring the quality and peace-of-mind of Revotec products to your XJS cooling system.

XJS auxiliary replacement	37-1290	\$339.99
---------------------------	---------	----------

Red Line Water Wetter

Many Jaguar cooling systems are barely adequate for American driving. With the addition of Red Line Water Wetter, systems can operate 5-10 degrees cooler and get a boost in corrosion protection compared to untreated conventional coolant. One 12 oz bottle treats 12-16 quarts of coolant. Advised to replenish every 15,000 miles.

Water Wetter	220-115	\$24.99
--------------	---------	---------

Evans Waterless Coolant

Evans Waterless Technology coolants are chemical blends that yield more efficient engine cooling compared to conventional coolants. Lack of coolant vaporization results in better metal temperature control and the increased boiling point (375 F at zero psi.) eliminates boil over, cavitation, and detonation. What's more, cooling system electrolysis and corrosion (critical issues with Jaguar engines) are eliminated. While not inexpensive, these are lifetime products that never need to be replaced. Evans Coolants are also non-toxic and pose no threat to pets unlike deadly conventional coolants. Sold per gallon.

Evans Coolant, Gallon	29-9950	\$64.99	OS
Coolant Prep, Gallon	29-9952	44.99	OS

Dry Foam - Wire Mesh Domed Filters

The wide space wire mesh and dry foam elements offer superior air filtration with a minimum of attaching parts and fuss. Stamped steel and chromed backing plate mounts securely to each carburetor. Includes breather fittings. Filter elements are washable and reusable. Replacement elements available.

1.75" Stromberg	223-240	\$46.99
Replacement Foam, Oval	37-0893	15.99

XJ6 Stromberg-to-Weber DGEV Carburetor Conversion Kit

This kit allows one to adapt modern-style twin Weber DGV carburetors directly to the Stromberg manifold. Supplied with everything needed to make the conversion. Manifold adapters, carbs, linkage, gaskets and hardware. However, due to the many variations of XJ6 manifolds and throttle linkages, some "ingenuity" may be required. Professional or skilled DIY installation recommended.

Weber Conversion 37-1526¹ \$1,249.00 

¹Not legal for use on some pollution controlled vehicles in the USA

XJS Fuel Hoses, 1981-91

The blistering under-bonnet heat of an XJS has a nasty habit of cooking things like wiring and cooling hoses. We highly recommend regular inspection of the fuel hoses as well. If they are no longer flexible, replacement would be prudent. The following hoses -- available individually or as a kit of four -- fit 1981 to 1991 XJS HE (VIN 1050418 to 179739) and are quality products made in the USA.

Four Hose Kit	23-2650	\$359.99	Rail to Outlet Regulator	EAC9986	93.59
To Inlet Regulator	CBC7979	109.99	Inlet Regulator to Rail	EAC9987	98.99
Clamped to Outlet Regulator	EAC7938	65.99			

Pricing is subject to change.

Please visit MossMotors.com/Jaguar for current pricing and availability.

PERFORMANCE

Flame-Thrower® Electronic Distributors from Pertronix Performance Products

Replace your worn-out Lucas distributor with a brand new electronic unit. Two versions are available: Standard units incorporate the original Ignitor® ignition and vacuum advance. The high performance distributor is mechanical advance only and uses the Pertronix Ignitor II® micro-processor ignition. Both types are ready for installation with only two wires to connect. They fit carbureted XJ6 only. 30 month warranty for electronics & limited one-year mechanical.

Features, Standard Distributors

- Tailored advance curve for optimal performance and drivability.
- Delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy and spark plug life.
- 2:1 improvement over points in current fall time for increased coil output.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit-no points to burn & no moving parts to wear out.
- Stable timing-no need for any adjustments.

Replacement Cap & Rotor Kit, All	D606600	24.99

¹For use with standard distributor.

²For use with high performance distributor.

Features, High-Performance Distributor

- Tailored advance curve for optimal performance and drivability.
- Variable dwell maintains peak energy throughout the entire rpm range, reducing misfires while improving engine performance.
- Develops on average four-times more available energy between 3000 and 5000 rpm, and two-times more plug voltage.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil and module life.
- Adjusts spark timing at higher rpm to compensate for the inherent electronic delay.
- Senses start-up and develops more energy for quicker, easier starting.
- Built in reverse polarity and over-current protection shuts down the system, preventing component damage.

Bumble-Bee Racing Wires

Lucas-style vintage "Bumble-Bee" ignition wire. This racing ignition wire is made from solid stainless steel core, sold in bulk, by the foot. Installer must supply wire-ends and boots of choice. A great period application that works great!

Lucas Ignition Wire, bulk sold per foot	571-020	\$8.99
---	---------	--------

PERTRONIX

Pertronix Ignitor Kits

You've asked for them and here they are: the popular Pertronix Ignitor ignition conversion kits. They eliminate troublesome breaker points forever with an incredibly neat magnetic pick-up that's fully contained within the distributor cap for a "no one will ever know" installation. Available for standard cars and for cars that have been converted to negative ground. To get the most of the Ignitor kits, also purchase the appropriate matched coil.

High-Torque Starters by WOSP Performance

Give your Jaguar the high-torque advantage! Whether you're having problems starting your engines or simply want an upgrade, our selection of high-torque starter motors by WOSP perfectly meet your requirements. Manufactured in the UK, these gear reduction starters are powerful, lightweight, and built for performance. Offering increased torque, especially useful on high compression engines, these brand new starters are direct replacements built to withstand the rigors of all forms of motorsport! Quality and performance, WOSP starters have it all. Application specific.

Features:

- All units are 100% brand new.
- Based on the Denso conventional offset gear reduction design.
- High power 1.0 kW and 1.4 kW Denso motors modified to suit each application and individual requirement.
- Manufactured with the latest electronic testing equipment to check the performance of every product produced.

XJ6 Ser. I, II & III	37-4001WSP	\$319.99
XJ12 & XJS V-12	37-4002WSP	349.99

Upgraded Voltage Regulator

Unlike an original mechanical regulator, this is completely new, solid-state, electronic version encased in an original-style housing. It has load dump protection and adjustable voltage while retaining the original look and connections (NEG-POS-FLD). Voltage is factory-set at 14.2V. The LMAR23 keeps the battery at full charge by managing proper alternator output under changing loads and varying speeds. Maximum field current is increased from 3 to 5 amps to safely yield the most from the alternator.

XJ6 Series I w/ Butec Alternator	C31526	\$179.99
----------------------------------	--------	----------

High-Torque, Quick-Spin, Gear-Reduction, Bolt-On Starters For XJ

These high-performance starters spin the engine much faster than the stock starter, firing it off sooner. This small lightweight gear-reduction unit is a much simpler bolt-in job than the heavy standard type starter. As much as 15 pounds lighter than originals they are provided with a full one-year warranty.

Series I, II and III XJ6	37-4001	\$229.99
XJ12 and XJS V-12	37-4002	239.99

Compact Battery Disconnect

Installs on battery ground terminal to make for a quick disconnect for theft deterrent or storage. For top post batteries. This switch is simplicity in action. Merely attach, following the manufacturer's instructions, and when anticipated prolonged periods of "down time" occur, simply turn the knob to disconnect the battery from the loop. Once installed no tools are required to arm or disarm.

Battery Switch	145-795	\$7.99
----------------	---------	--------

Battery Cut-Off Switch

Place in the ground line for emergency power cut-off. Waterproof with removable "key."

Keyed Battery Switch	145-785	\$29.99

GAZ Shock Absorbers

KEY FEATURES AND BENEFITS FOUND WITH GAZ

Flexibility: Easy 36-point rotary adjustment provides simple fine tuning without the need to remove the shock or use any tools.

Revolutionary: Double-lip seals plus a further stem seal on the piston rod produces a shock with unrivaled performance characteristics for both road and track.

Drivability: Due to the manufacturer's background and their complete understanding of damping technology, GAZ shocks strike the ideal balance between comfort and performance road holding.

Reliability: EVERY UNIT is fully tested and delivered with an individual shock dyno report.

Quality: Each unit is made to ISO 9002 specifications and supplied with a limited 3-year warranty.

Durability: Zinc-plated body resists salt spray and road grime.

GAZ shocks offer a 30-point on-the-car rotary adjustment, two piston seals and a zinc-plated body for maximum corrosion resistance. Every GAZ shock is built to ISO 9001 standards and is fully tested and supplied with a dynamometer report. Three-year warranty.

COBALT
PRECISION AUTOMOTIVE

Rubber Brake Hoses by Cobalt

All brake hoses aren't equal. These hoses are a product of many R&D hours devoted to improving quality, safety and performance of these critical brake components. The rubber brake hoses by Cobalt go the extra yard by welding the metal joint end connections for strength and reliability. Other hoses simply press-fit their connections. We stand behind the Cobalt difference.

Front - Series I, Early Series II 011-612 \$12.99

TKO 5-Speed Transmissions

TKO 500 Standard 5-Speed Transmission:

Rated for a continuous 550 HP and 500 ft/lbs of torque, this gearbox has a low 3.27 1st gear and .68 5th gear. This is the most popular choice for the 1981-1993 XJS HE which has a 2.88 rear-end ratio. The low first gear gives dramatically better acceleration without changing the differential ratio. 5th gear is excellent for low-rpm cruising above 70 mph. Top speed is increased.

TKO 600 Close-Ratio 5-Speed Transmission:

This gearbox will handle more than 700 HP and has a 2.87 1st gear and a choice of a .64 or .82 5th gear. These ratios are best suited to cars equipped with a 3.54 differential. The .64 5th gear is excellent for efficient high-speed cruising, whereas the optional .82 5th gear is excellent for road racing or other applications where you do not want a large rpm drop between 4th and 5th gears. Top speed is increased.

New Brake Calipers

If your XJ needs brake calipers, Moss Classic Jaguar has taken the hassle and expense out of the equation with brand new, complete, parts. They're sold outright with no core charge and are bolt-on replacements for your original calipers, so no fiddling with rebuild kits, rusted-in-place pistons, etc. Purchase pads and retaining hardware separately. Rear calipers AAU3378 and AAU3379 include bridge pipes and are not for later XJS with outboard rear calipers.

EBC
BRAKES

EBC GreenStuff Brake Pads and Turbo Groove Rotors

EBC GreenStuff brake pads offer exceptional performance without the drawbacks of a full-race brake pad. Braking force comes on strong from first pedal application, delivering powerful braking right up to a blistering 500°C disc temperature. GreenStuff pads contain no carbon black, which deposits on wheels, or metallic fibers, which can cause fast rotor wear and noise. EBC Turbo Groove Rotors are precision CNC-machined using quality grey iron castings. Sold in pairs, Turbo Groove Rotors feature a combination groove and blind hole design. The blind holes resist cracking and help surface degassing under heavy brake load. The grooves promote flat pad and disc wear and help clean debris and dust from the braking surface. Rotors are zinc plated and gold passivated to prevent corrosion in areas not swept by the pad. The combination of GreenStuff pads and Turbo Groove rotors will yield large gains in braking performance at a reasonable cost. If it's time for pads and rotors on your XJ, we suggest you make a significant upgrade while you're at it.

Whitworth Drive Sets

Made from high-quality forged materials, King Dick drive sets make for a perfect addition to the tool cabinet of any classic car enthusiast. The drive sets use precision drop forging methods to ensure uniformed steel structure. The sockets are broached to size using exceptional accuracy, then ground and polished before being heat treated for consistent and reliable strength that you can count on! The drive sets are then polished again and stamped for the final touch. The nickel chrome plating ensures maximum resistance to corrosion that also serves to enhance the appearance of the drive set. Check our website for details of each kit.

Keep Calm and Wrench On Work Mat

Stay comfortable as you work on your car with these logo'd work mats. Customized for your British sports car, these work mats are made from closed cell foam, and offer comfort as you sit, kneel, or lay down to work on your car repair projects. Measuring 72" x 24" x 5/16", they are perfectly sized to be kept in your trunk. Made in the USA, these work mats are water and chemical resistant, and they do not stain easily.

Work Mat 217-805 \$45.00

Jaguar Work Pad

Stay comfortable as you work on your car using this logo'd work pad. Customized with the Jaguar logo, the work pads are made from Softek™ closed-cell foam, and offer comfort as you sit or kneel to work on your car repair projects. Measuring 11" x 15" x 3/4", they are perfectly sized to be kept in your trunk. These lightweight foam cushions can be used on multiple surfaces at home, garden, or on the road, and feature a cut-out handle making it easy for you to carry them around. Made in the USA, these work pads are water and chemical-resistant, washable, do not stain easily, and are practically maintenance free. Just wipe away any dirt with a wet tissue or cloth and you're good to go!

Work Pad 214-703 \$24.99

Jaguar Shop Apron

Easily access your tools as you get ready to repair and restore your classic British car. Bearing the Jaguar Wings logo. Made from 100% cotton, it is machine washable, features 2 deep front pockets for easy tool access, one-inch-wide adjustable neck strap, and long belts you can comfortably tie around your waist. With stain release technology, this high quality shop apron maintains color and allows stains to be removed easily during laundering without affecting the fabric weight or breathability. So cover up and work with confidence!

Shop Apron 217-215 \$24.99

Polyurethane Vise Jaw Pads

Made by the same folks who manufacture our polyurethane suspension bushings, these pads are held to your vise with magnets and are easily trimmed to fit.

Polyurethane Vise Jaw Pads 37-6031 \$29.99

Low Rise Car Ramps

Getting a low rise car ramp is the best solution to lift your car enough to easily place a trolley jack underneath. Also, these durable ramps can be used when you want to store your car raised sufficiently to prevent the build-up of moisture under the tires. With multiple uses, these high-quality low-rise car ramps are a practical necessity for both lowered cars and trailers as well.

Capacity: 11,000 lbs per pair

Size: 27 1/2" (l) x 7 4/5" (w) x 2 3/4" (h) with 3" end stop

Low Rise Car Ramps - pair 225-650 \$94.99

ACCESSORIES

MUS 4.3 Battery Test & Charge by CTEK

The MUS 4.3 Test and Charge combines a microprocessor-controlled battery charger with a battery and alternator test function to provide the ultimate in battery testing, charging, and maintenance.

Testing - Three easy to use programs test battery voltage, starting power, and alternator performance to provide a complete picture of battery and vehicle charging system health.

Charging - This charger solves a broad range of battery problems. Its features include a patented automatic desulphation program and a special reconditioning function that can revive deeply discharged and stratified batteries. The patented Float/Pulse maintenance setting makes this charger ideal for long-term battery maintenance.

Features & Technical Info:

- Input 110-120VAC, 50-60Hz, 0.6A max
- Output 14.4V/14.7V/15.8V, 4.3A max
- Fully automatic 'connect and forget' 8 step 12V charging cycle
- 3 voltage test programs
- Battery types: All types of lead-acid batteries, 12V, WET, MF, Ca/Ca, AGM, GEL
- Insulation: IP65 (splash and dust proof)
- Patented float/pulse maintenance for batteries up to 160Ah
- 5 Year Limited Manufacturer Warranty

Wire Harness Repair Kit

Fast, Secure Connections Made Easy.

Our wiring harness repair kit makes fast, secure wiring connections a snap. Just crimp a bullet to each wire end using the included bullet crimping tool, push bullet ends into the connector sleeve and snap firmly into place with the closing tool for a permanent repair.

The high quality, bullet crimping tool ratchets closed to put a secure hexagonal crimp in bullets. The closing tool presses bullets firmly into both single- and two-wire connectors.

Bullet Closing Tool	161-761	54.99

Jacking Wood, Series I and II

Jaguar recommended that Series I and II E-types be jacked from the front using a piece of wood under the front cross member, or "picture frame." We've improved upon their suggested design by providing a wider "land" for the jack. Manufactured locally using tough hardwood. If your car has been repeatedly lifted without using such a block (and most have), the flanges at the bottom of the picture frame may be bent; they'll need to be straightened for this block to fit.

Jacking Wood	37-9735	\$22.99
--------------	---------	---------

Jaguar Special Tool Section

A few notes regarding tools: Not all tools are consistently available, so some numbers are listed as reference only. Some tools are available as NOS or used only and some reproductions are more accurate than others. Finally, Jaguar most likely used more than one manufacturer for some items or kept the same part number during the evolution of a certain item. Bottom line: we will do our best to describe what we have on the shelf.

ACCESSORIES

Hylomar Sealants and Assembly Adhesives

Hylomar Limited manufactures a wide range of high-performance sealants and adhesives used by some of the leading OEMs in the world. Hylomar products are also widely used and respected in the automotive, aerospace, and industrial aftermarkets.

Hylomar M was originally the Racing Formulation. It is acetone-based, stiffens slightly over time and can be used in place of a gasket between finely machined surfaces. This product comes in a tube and an aerosol.

Hylomar Advanced Formulation (AF) is solvent-free, won't harden and is perfect for use with gaskets on parts that need to be removed regularly for service. AF fills imperfections on mating surfaces, thus forming a seal.

Hylotype RED is a semi-hardening gasket and jointing compound offering improved gap-filling capabilities. The product is resistant to a wide range of fluids, especially water (including salt water and steam), anti-freeze, and synthetic oils. It forms an instant seal, has a heat-activated curing system and is methylene chloride free.

Hylomar Cleaner removes used Hylomar gasket and jointing compound from disassembled joints. The unique mix of solvents also make it perfect for cleaning and degreasing surfaces prior to use with any of Hylomar's range of adhesives and sealants. It is also very effective at removing uncured anaerobic adhesives, uncured silicone, and uncured epoxy products.

Hylomar AF - 85 g Tube	232-215	\$34.99
Hylomar M - 80 ml Tube	232-220	24.99
Hylomar M - 200 ml Aerosol	232-225	39.99

Brake Fluids by Dynolite

Dynolite Brake Fluids prioritize quality and safety. DOT 4 is a premium polyethylene glycol blend with a minimum dry boiling point of 500 F, exceeding industry standards. It has excellent lubricity, a firm pedal feel, and works well with rubber parts. DOT 5 is a non-hygroscopic, non-corrosive silicone brake fluid, making it ideal for historic vehicles. It maintains a boiling point of 500 F throughout its life and has an operating range of -58 to 500 F. DOT 5 does not mix with glycol fluids, so it is best to convert during a total brake system overhaul.

DOT 4 - 500 ML	220-403	\$9.99
DOT 5 - 1 L	220-413	34.99

Carb Dashpot Oil by Dynolite

Give your dampers and pistons longer life with Dynolite Carb Dashpot Oil. Formulated for SU and Zenith Stromberg Carburetors, this synthetic SAE 20 grade oil contains anti-corrosion and anti-wear additives that provide superior cold and hot temperature performance as well as lubrication.

125 ML	220-226	\$9.99
--------	---------	--------

221-410

221-406

Copaslip Anti-Seize Compound

This anti-seize is highly recommended for wire-wheel splines and knockoff threads. The Molybdenum formulation reduces galling and corrosion to improve the life of wire wheels and hubs. Wheel and hub surfaces should be cleaned and re-lubricated at least once per year as part of a regular maintenance program.

3.5 oz Tube	221-406	\$24.99
250 g (8.8 oz) Jar	221-410	37.99

Dynolite Fuel Additives

Dynolite Valve Guard is a high performance, three-in-one formula that combines an efficient octane improver with ethanol corrosion protection and a lead substitute.

Features:

- Prevents valve recession
- Combats adverse effects of ethanol
- Cleans and maintains the fuel system
- Carburettor anti-icing protection
- Add up to 4 octane to unleaded fuel (at maximum over treatment)
- Reduces detonation/engine knock (pinking or pinging)
- Suitable for vehicles requiring leaded or high octane fuel

Dynolite Lead Substitute is a lead replacement fuel additive formulated to protect against valve seat recession under all driving conditions whilst keeping the fuel system clean and protected against corrosive effects of ethanol fuels (E5 & E10).

Valve Guard, 3 in 1 fuel treatment, 250 mL	220-367	\$14.99
Lead Substitute, 250 mL	220-391	12.99

Reusable Auto Dehumidifier

Get rid of musty odors and foggy windows with the easy-to-use Auto Dehumidifier! This innovative product absorbs excess moisture and greatly reduces humidity so that you can safely begin your daily commute in a fresh smelling car with a clear windshield. This compact, portable, and unbreakable pouch sports an elegant carbon-fiber design that is sure to add a modern vibe to your car. A patented moisture indicator blue dot turns pink when saturated. To reuse, simply put it in the microwave for 6 minutes! Kid and pet safe. 1 Year Limited Warranty.

Auto Dehumidifier 220-215 \$15.99

Detailing Brush by Brush Hero

Say goodbye to grime, muck, and road dust with this detailing brush. Ideal for wheels and the exterior of your car, this original waterpowered car wheel brush meets and exceeds your car washing and surface detailing needs. Crafted from high quality injection molded plastic that doesn't corrode, this long-lasting tool is designed to rotate with continuous strength to provide a lanceled rollout of power throughout the brush head. With its slow and steady spin, it offers maximum scrubbing power so not a single spot is missed. No batteries or electricity required, just attach it to your garden hose and you are good to go! Includes 2 brushes.

Detailing Brush 220-840 \$29.99

Connolly Hide Care

This is the same famous "Hide Food," only the name has changed. Apply once a month to keep leather clean, soft and luxurious. Made in England.

Connolly Hide Care 220-210 \$29.99

Moss Gripper Fender Cover

Protective fender cover grips the paintwork and will not slip.

Moss Fender Cover 990-991 \$35.00

Auto Dry Blade

This 11½" water-wand swipes away surface water. The soft silicone contours to your vehicle's shape and glides over any paint surface without scratching the finish. Produces 15% less friction than terrycloth.

Auto Dry Blade 231-674 \$19.99

Wire Wheel Bristle Brush

When purchasing a set of new wheels, we think it's also a good time to get some new tools to maintain their fresh new looks. Try a new stiff-bristle brush for the occasional vigorous scrubbing.

Stiff Bristle Brush 386-940 \$8.99

Mini Duster

The same technology as the original duster but in a smaller size. Great for interior or hard-to-reach areas. Ideal to keep in the car for a quick "touch up."

Mini Car Duster 231-671 \$14.99

Professional Car Duster

100% cotton dusting mop is treated with special wax to trap dust. Simply shake it out and it's ready to use again. 20" long. Comes with a protective carrying case.

Professional Duster 231-670 \$23.99

The Complete Book of Jaguar

Begun by a couple of motorcycle enthusiasts-William Lyons and William Walmsley-as a firm called the Swallow Sidecar Company, Jaguar became one of the world's most celebrated automakers! In England's bleak postwar years, Jaguar was a shining star-first with its XK120, then followed by the XK140 and XK150. Sporting sedans like the Mark 2 and Mark X set the bar for luxury four-door transport in the '50s and '60s. And then Jaguar stunned the world with the achingly beautiful E-Type in 1961, a genuine 150 mph super sports car.

Methodically written and narrated, The Complete Book of Jaguar covers models from the original SS Jaguar to today's F-Type sports cars, F-Pace SUV, X-Type sedans, as well as concept cars. It discusses the cars and technology, while spec tables highlight key technical and performance specifications. Get your guide to this important part in the history of sports and luxury automobiles

XJ6 Owner's Manual

Moss Classic Jaguar offers premium quality reprints of the Jaguar factory Owner's Manuals for most models. These are imported from an English publisher and include all the general information including general controls, instruments, transmission, coachwork, induction, electrical and maintenance schedules. Some offer fold-out wiring.

XJ6 Series II, 62 pages 31-0055 \$11.99

British Leyland, The Cars 1968-1986

In 1968, British Leyland brought together most of Britain's motor manufacturers with the intention of creating a robust unified group. But this was not to be. While there have been many books about the politics and the business activities of British Leyland, this book deliberately looks at the multitude of cars that came from the company specifically from 1968 to 1986 when the old British Leyland ceased to exist. What was left of the car and light commercial business was then renamed the Rover Group. British Leyland, The Cars 1968-1986 by James Taylor expertly covers the production histories and technical specifications of every major model, offers insightful information on special overseas models; appendices on engines, code names and factories, and also provides guidance on buying these classic cars! Worth adding to your library.

Jaguar Factory Floor Book

In Jaguar from the Shop Floor, Brian Martin tells the story of his life as a long-time employee at Jaguar, giving a first-hand account of the development and production processes, and the ups and downs of factory life.

In this part-autobiographical and part-historical account, the author tells of his childhood in a typical working family of the depression era, and then describes his career from starting at the Jaguar factory in 1949, through a spell doing national service in the RAF and then going back to Jaguar. He left briefly in 1972 to try other jobs, but returned to the factory in the mid-1970s. Providing a fascinating insight into the Jaguar production process, the book also covers the development of the XK120, Mk V, Mk VII, MK X. The Mark 1 and 2 (2.4, 3.4 & 3.8 liter) saloons, the XKSS, E1A, E2A, lightweight E Types, XJ6 XJ12 & XJS.

The author has spent most of his working life in the employ of Jaguar Cars Ltd. He is a long time member of both The Jaguar Drivers Club, The Jaguar Enthusiasts Club, The Jaguar Apprentices Motor Club and was a founder member and ex-chairman of The Jaguar Car Club. During his employment he has held various positions with the Jaguar company, from assembly worker to experimental and development engineer, and junior management. He is a lifelong enthusiast of the Jaguar marque and has owned many of the models described in this book. (He currently owns a 2001 XJ8).

The Art of the Classic Sports Car

Sports cars are the athletes of the automotive world offering the road and track excitement for nearly a century. Always nimble and quick, often powerful, sports cars fly where other cars lumber, and dash where others plod.

The Art of the Classic Sports Car offers enthusiasts a beautifully illustrated review of several decades of high-performance cars from around the globe, all shot in the studio to ensure a handsome book. Each featured car includes a profile discussing the car's place in sports car history, technical, and performance specs as well as a smattering of historical images and period ads.

The Red Car

Originally published in 1954, *The Red Car* is a timeless tale that has been translated in several languages. It is the story of Hap Adams, a teenage boy who finds a beat-up MG TC sports car, restores it, and learns the joys of sports cars and driving from the town mechanic, Frenchy Lascelle. The book makes for a wonderful companion for any classic car enthusiast and is the perfect pick to introduce the love of LBCs to a younger audience. Order your copy today!

Classic British Car Electrical Systems

The electrical systems used in British cars from 1950-80 have gained some notoriety, most of it unfavorable and much of it undeserved. Based on a formula proven in Rick Astley's previous and much acclaimed book, "MGB Electrical Systems," this new book breaks down the electrical systems of classic British cars into separate and easily understandable sections. With hundreds of color photographs, diagrams, and fault-finding tables, the veil of mystery is removed. Softbound, 176 pages, 8" x 10.6".

Parts Manuals

Trying to maintain and/or restore a Jaguar without the official parts manual is like operating blind. These manuals list every nut, bolt, and washer. A necessary companion for any project.

Because the early manuals are out of print, we have sourced these manuals through alternate supplies. Imported from English publishers, they provide an ideal authoritative source for the mechanic. Shown in detail are all the assemblies for a given model.

ORDERING & SHIPPING

SHIPPING

- Shipping is calculated on the regular retail price before any discounts.
- Orders received by 3 p.m. local time are normally shipped same day when shipped by UPS Ground Preferred or UPS Air.
- We will ship by Ground Saver unless an alternate shipping method is specified.
- Alaska, Hawaii, Puerto Rico must choose either AK/HI/PR Saver or UPS Air (see info below shipping chart).

OVERSIZE PARTS FEE

Some items are oversized and are indicated by the oversize parts fee icon. An oversize parts fee (per item) will be applied to your order. This fee will still be charged on free shipping orders. You can find the amount of the fee by visiting MossMotors.com or calling 800-667-7872. The oversize parts fee will not be charged on orders that ship by truck freight.

TRUCK SHIPMENT FEE

- Some parts must be shipped truck freight. Orders shipped to the 48 Contiguous states will be charged a flat \$199. Orders shipped to Canada will be charged a flat rate of \$279.

PO BOX, A.P.O. OR F.P.O.

- A.P.O., F.P.O. and P.O. Box orders are not guaranteed and will be shipped via USPS.

UPS AIR DELIVERY SERVICE (48 STATES)

- Saturday Delivery - Available on UPS Next Day Air and UPS 2nd Day Air orders for an additional \$16.00 and is not available in all areas.
- Orders shipped by air that are over 40 lbs., by weight or dimensions, we reserve the right to charge actual shipping and will notify you in advance.

INTERNATIONAL ORDERS

Orders delivered outside of the USA may take additional time to ship due to additional documentation and payment verification.

- All import costs and fees including duties and taxes are the responsibility of the customer.
- First-time orders and some larger orders may require payment by wire transfer.
- Orders may require a shipping quote and customer approval prior to shipping.
- Customer assumes liability for any disputes or damages when providing their own shipping arrangements.
- Orders are shipped by Air Post when possible. At times, Canada Post may use ground shipping for delivery.
- Shipping charges on orders under \$700 are calculated in the cart during website checkout.
- Orders **under \$700** that are heavier than 40 lbs. (by weight or dimensions) will be charged actual shipping.
- Orders **over \$700** will be charged actual shipping.

See MossMotors.com/ordering-shipping for full details on our ordering and shipping policies

PAYMENT

- We have a \$10 minimum parts order, excluding tax and shipping.
- We accept certified check, money order, and the following credit cards:
- Due to increasing fraud, some foreign orders may require additional documentation to process your order.

WHEN YOUR ORDER ARRIVES

- Please remember to inspect your parts immediately upon receipt of your order.
- Should your order arrive in damaged condition, immediately inform a Moss Motors customer service representative at 1-800-689-9313.
- Claims for damage during shipping must be reported within 3 days of receipt of order.
- Keep original box and packing material.
- If your order was shipped truck freight, note damage on the bill of lading when signing the delivery receipt.
- If there are any other questions about your order, contact customer service within 10 days.

SPECIAL ORDER & DIRECT SHIP PARTS

- Require pre-payment by cashiers check or credit card and may not be cancelled or returned.

BACKORDERS

- Occasionally, we are out of stock on some items, which we will ship to you as soon as available.
- Backorders are shipped free but carry a handling charge of \$3.49 per \$25 of value. (The combined total for original order shipping, and all backorder handling fees, shall never exceed the total shipping charges quoted on the shipping chart on this page.)
- You may request "No Backorders" or cancel backorders at any time prior to shipping.
- We do not backorder to any foreign countries, including Canada.
- Backorders are sent by the most cost effective method, not necessarily the same method as the original order.

WARRANTY - THE LONGEST IN THE BUSINESS!

- All Classic British products are warranted to be free from defects in material and workmanship for 2 years from the date of invoice.
- All superchargers, supercharger components, and supercharger hardware are warranted to be free from defects in material and workmanship for 1 year from date of invoice.
- Moss Motors, Ltd. will, at its discretion, repair or replace any part that fails in service within the warranty period. This warranty does not cover labor, failure of related components, normal wear of brake or clutch components or failure resulting from alteration, misuse, accidental damage, faulty installation, or faulty repair.
- Warranty requests should be submitted to our sales department and must be supported by the original Moss Motors purchase invoice and documentation of the failure.

About This Catalog

This catalog covers parts for U.S.-specification left hand drive cars. In producing this catalog, our primary goal was to publish a listing of Jaguar parts which was as accurate and informative as possible for the U.S. market. In doing this, we have made every effort to correctly identify and include every part we stock likely to be needed to repair, restore or maintain your car. Although some of the parts listed are not currently available, our Product Development staff is constantly seeking new suppliers and manufacturers of quality reproductions of otherwise obsolete items. The current Moss Motors website (www.mossmotors.com) pricing is always the best indication of availability.

Local laws and regulations relating to pollution, safety and lighting equipment vary considerably from state to state and country to country. Since we distribute parts for these cars on a worldwide basis, we are not in a position to advise what laws are in effect in each locality. We strongly encourage anyone contemplating any modifications to a vehicle intended for street use, to check local regulations before proceeding. We strongly suggest that you save all old stock equipment should reinstallation be necessary at a future date.

NOTE: In the body of this catalog, items with indented descriptions are components of the non-indented kit or assembly above them. When an indented component is "NA", it is still included in the assembly, but not available separately.

Supersession and Rationalization of Parts

Most owners of British cars have, at one time or another, ordered an original "factory" part from an authorized dealer, only to find that the part received was different from the original, although it did work. This is the result of the supersession or rationalization of parts by the factory. Supersessions occur when a part is modified, and the original design or pattern is no longer produced. If old and new parts are interchangeable, even though they may appear slightly different, the old part is superseded by the new part. Rationalization is an attempt by the factory at efficiency in which one new part replaces several original parts, after which the original parts are no longer available.

123-456

Underlined part numbers indicate an Oversize Parts Fee will be charged. See mossmotors.com or call for details.

WARNING!

Working on automobiles is inherently dangerous. Moss Motors, Ltd. is not liable for injury or damage due to incorrect installation or use of their products. All products are sold with the understanding that the safe and proper installation and use of the products is the customer's responsibility. Follow factory workshop manual procedures and instructions, but use current shop safety standards and common sense. Some tasks will require professional advice or services which Moss Motors cannot provide.

Production Info

XJ6, XJ12

For such a small company, Jaguar has more than its fair share of icons. Count the XJ6 sedan, or saloon, among them. Introduced in September 1968 via a carefully choreographed production at London's Royal Lancaster Hotel, Hyde Park, the new XJ was an immediate hit and set the styling idiom for Jaguar's large sedans for four decades. And rightfully so – the car looks just as handsome today as it did in 1968.

Series I XJ6, 1969-1973: Built on the short-wheelbase (9'13/16") chassis only, all USA-specification cars were equipped with the venerable 4.2-liter "XK" six-cylinder engine with Stromberg carburetors.

Series II XJ6, 1974-1979.5: Virtually all USA-specification cars were built on the new long-wheelbase (9'4-13/16") chassis. Larger bumpers designed to meet American regulations and a smaller radiator grille spoiled the XJ's looks somewhat. To better cope with more stringent emissions requirements, later cars were fitted with fuel injection. A two-door coupe version of the Series II was also produced. While improved in some ways over the Series I, the Series II cars were produced during perhaps the darkest years of the British Leyland regime known for repeated labor strikes and poor assembly quality.

Series III XJ6, 1979.5-1987: While the Series III was really a stop-gap until a true replacement could be built, it turned out to be one of the best Jaguars ever built. A masterful styling update by Italian design house Pininfarina, which included a more raked windshield and nicely integrated bumpers and lights, returned the XJ to its former glory. All Series IIIs for the US market were fuel injected and built on the long-wheelbase chassis (there were no two-door models). Build quality was greatly improved over the Series II as Jaguar finally began to get tough with suppliers who delivered sub-par components. If you're looking for a classic Jaguar that's reasonably priced, has good parts availability and is easy to work on, the Series III is an excellent choice.

Series I, II and III XJ12: Twelve-cylinder versions of the XJ were built in all three series. Series I and earlier Series II cars were carbureted. Later Series II and all Series IIIs were fuel injected. The Series III XJ12 was never sold in the USA, but our Canadian neighbors were luckier. It finally went out of production in 1992.

XJS

Jaguar enthusiasts were clamoring for an E-Type replacement, but the V-12-powered XJS was more grand-touring machine than the sports car they were hoping for. Introduced under the dark cloud of British Leyland – and with the attendant quality control problems – the XJS nevertheless received nearly constant development to improve quality, economy and performance. The 1976-1980 cars are known as “pre-H.E.” cars and are easily identified by their all-black bumpers. Introduced in 1982 (there were no 1981 model year cars) the H.E. model was fitted with the new High Efficiency cylinder heads (hence the “H.E.” moniker), chrome-topped bumpers and a host of other improvements. A convertible version was available to USA buyers in 1986 but it was a stop-gap car built by USA limousine maker Hess & Eisenhardt (be careful here as virtually no parts unique to the H&E cars are available). A Jaguar-built convertible was introduced in May of 1988 and was available for the rest of XJS production. Jaguar introduced the “facelift” XJS in 1992. It featured larger rear quarter windows that eliminated one of the most criticized styling elements of the original and “wrap-around” tail lights that were, well, different. In 1994 body-color front and rear bumpers/fascias were introduced. On the engine front, the 4.0 liter AJ6 six-cylinder was available in 1992; it was replaced by the improved AJ-16 engine in 1995. The 5.3 V-12 soldiered on until 1994 when it was replaced by a 6.0-liter version.

Today the XJS represents one of the all-time automotive bargains. They are relatively plentiful, mechanically honest and reasonably priced. Mechanical parts are readily available but many body and trim pieces are not. We hope Jaguar will re-introduce some key components listed herein.

35	EBC3163	NA	PUMP ASSEMBLY		1
EBC3163 is as fitted to 1991-on 5.3 and 6.0 Liter cars. When replacing a pre-1991 pump, the JA-EBC4240 drive gear must also be used but the conversion is a bolt-on proposition. When replacing an XJ-12 pump prior to (e) 7P.32246, the engine block must be professionally modified. We have an illustrated instruction sheet available.

Carb Synchronizer

Far more accurate than even the most experienced ears, this simple tool is essential for proper balancing of multiple carburetors.

386-200 \$39.99

Stromberg Carburetor Mixture Adjusting Tool

By rotating the allen key, the needle is raised or lowered to richen or weaken the mixture, respectively. The outer barrel ensures the air valve won't rotate and potentially damage the main diaphragm.

386-310 \$11.29

Jet Installation Tool

Stromberg jets eventually require replacement, but it's a tricky and tedious job. Our new installation tool takes the guesswork out of correct jet replacement.

386-311 \$109.99

			This tool makes removing and installing standard bushings a relative breeze.		

A chronic problem with XJ Jaguars is steering rack mounts. They're under constant attack from heat and fluids. The result is weakened mount bushings and poor steering feel. The solution is our polyurethane rack mount kit which is highly resistant to heat and oil. It gives more precise steering and will far outlast the factory pieces. Kit fits all Series I, II, and III XJ-6/XJ-12 and XJ-S.

Steering

Our steering racks are rebuilt to original specifications or better using all new seals and gaskets. Each unit is high-pressure tested and guaranteed for one year after purchase. Boots and tie rod ends are included but not mount bushings; purchase separately. We also recommend you to replace hoses. A system flush is mandatory. We cannot warranty racks unless the power steering pump and hoses are all replaced. Core charges apply. Core refunds are reduced or rejected for disassembled or damaged racks and/or missing parts. We reserve the right to verify that your core is rebuildable before issuing a core credit.

Shock Absorbers

The shock absorbers listed on this page fit all XJ models covered in this catalog.

Shock Absorbers

14513

No.	Part#	Price (Each)	Description	Application	Qty Req.
	CAC9089KON	\$179.99	KONI SHOCK, front		2
	CAC9091KON	\$349.99	KONI SHOCK, rear		4

Considered by many to be the world's finest shock, KONIs have a racing heritage second to none. They last virtually forever and are adjustable off the car. KONIs are an excellent choice for hard-driven Jaguars. Warranted for as long as the purchaser owns the vehicle on which the shocks were originally installed (excludes bushings). XJ KONIs are gas.

	CAC9089SPX	\$299.99	SPAX SHOCK, front		2
	CAC9091SPX	\$339.99	SPAX SHOCK, rear		4

SPAX shocks offer Koni performance at less cost and are easily adjusted while on the car (Konis must be removed from the car).

	CAC9089KYB	\$74.99	KYB SHOCK, front		2
	CAC9091KYB	\$149.99	KYB SHOCK, rear		4

KYBs are excellent Japanese gas shocks that work great on XJ Jaguars, providing a more controlled (but not overly stiff) ride and much longer life than standard shocks.

	CAC9089BGE	\$124.99	BOGE SHOCK, front		2
	CAC9091BGE	NA	BOGE SHOCK, rear		4

Not everyone needs ultra-high performance aftermarket shocks, so we also offer quality replacement shocks made by Boge. Modern materials and manufacturing methods will help them far out-last OEM shocks.

	GT6-2108	\$134.99	GAZ SHOCK, front		2
	GS3-2109	\$149.99	GAZ SHOCK, rear		4

GAZ shocks offer a 30-point on-the-car rotary adjustment, two PISTON seals and a zinc-plated body for maximum corrosion resistance. Every GAZ shock is built to ISO 9001 standards and is fully tested and supplied with a dynamometer report. Three-year warranty.

	GP8-2110	\$214.99	GAZ SHOCK, rear, with adjustable spring perch		4
	34-7200	\$12.99	WRENCH FOR LOCKING COLLARS		1

Differential

Salisbury Differential, Pinion Components

14520

No.	Part#	Price (Each)	Description	Application	Qty Req.
The Salisbury differential was fitted to all Series I, II and III XJ-6/XJ-12 and XJ-S -- with the exception of some XJ-S (mostly in Europe) that were fitted with the Dana differential. There are two basic types of Salisbury differentials -- the "A"-type stub axles with two bearings and the "B"-type with three bearings.					
1	11099	\$10.99	PINION NUT		1
2	3840	\$11.99	PINION SEAL, 1-9/16" i.d.		1
Differential serial number has no suffix and flange seal face has an outside diameter of 1.57".

Ring and Pinion Kits

Kits include ring & pinion gears, rear cover gasket, inner and outer pinion bearings, pinion seal, pinion shims and pinion nut and washer.

Because the pinion spline differs from original, this set requires installation kit 33-1000 which includes a new front flange with the appropriate spline pattern. The kit also includes reducer sleeves for the ring gear mounting bolts.

Ring & pinion kits are supplied with the early type outer pinion bearing. For XJs, outer pinion bearing part number 071-350 must be purchased separately. The early type bearing has a race outer diameter of 2.875". The later bearing's race is 2.6875" in diameter.

Finally, there were two types of ring gear carriers, one for "short" (higher numerically) gears and one for "tall" (lower numerically) gears. When choosing a ring & pinion gear, you must stay within the original ratio range of each carrier. They are 5.89 to 3.92 and 3.73 to 3.07.

Torque ring gear bolts to 55 foot-pounds. Use red Loctite. Do not use any washers or lock tabs on ring gear bolts.

13	33-3001	\$519.99	RING & PINION GEAR SET, 3.07:1	A	1

Three-piston front calipers were fitted to Series I XJ-6 and XJ-12. They were also fitted to Series II XJ-12 4-door up to 2R.50210 and XJ-6 Series II four-door to 2N.51654. While most component parts are shared, Series I XJ-6 calipers are unique in that they do not incorporate spacers to accommodate a vented rotor.

Four-piston front calipers were fitted to Series II XJ-12 4-door from 2R.50210; XJ-6 Series II four-door from 2N.5165; all Series II XJ-6 and XJ-12 Coupes; XJ-6 and XJ-12 Series III; all XJ-S.

Brakes

XJ rear brake calipers are virtually the same from 1969 to mid-1993 but in the mid-'70s a larger groove was cut into the pistons to allow for a retaining ring for the rubber dust boots. A corresponding groove was cut into the caliper body. In addition, the mount flange was "fly-cut." Calipers are usually interchangeable as units, but the component parts are not. And, in some cases, later calipers will not fit an earlier differential, which can be difficult for hot rodders who don't know the history of their rear suspension. Early calipers fit XJ-6 Series I, XJ-6 Series II to 2T.58038, XJ-12 Series I, XJ-12 Series II to 2R.54650/2G.50651, 1976 & 1977 XJ-S. Later calipers were used thereafter.

Up to about 1976, XJ6 and XJ12 were fitted with front-mounted fuel level senders accessed through a panel in the wheel well. When the XJ6 received immersed pumps, the fuel senders were moved to the rear of the tanks and accessed by removing a tail light. Please note that many early cars now have replacement tanks with rear-mounted senders. Always inspect before ordering.

Wire Wheels

The second most frequently asked question about our cars must be "how do I take care of my wire wheels?" "Should the car be off the ground to hammer the knock-off, or should the wheel be on the ground?" Well, that's two questions, but the problem remains...Whether you call it a knock-off, a knock-on, a nut or a locknut, BMC felt inclined to issue a Technical Service Bulletin on the matter. In short, you should always hammer the nuts on or off with the wheel off the ground and free to rotate. While they don't say so, many people believe this will decrease the force transmitted into the spokes from each blow. If the wheel is not free to turn, then the spokes take the full brunt of each hammer blow.

The rest of the information is definitive! If you do as BMC says, your wheels should last much longer than if you don't. How many of you have had to hacksaw off a wire wheel, as it had become rusted to the hub? A few of you have. So inspect, grease, and check your wheels at least once a year, preferably before the rainy season. As an added precaution, why not use an anti-seize lubricant that comes in a large can with a brush in the lid. One can should last a lifetime and isn't all that expensive at a local auto parts store.

One final word, don't forget to use RTV silicone inside the wheel hub on top of the spoke heads - to seal out water and prevent grease or anti-seize lubricant from being spun out onto your spokes and wheels. Several of us have used this technique for years and it works great!

What can you do if either the wheel hub or the center of the wire wheel is too worn? It costs at least \$25 a wheel to dip (removes rust and paint), true (tighten each spoke uniformly, replacing several that won't turn), and repaint (who wants rusty wheels?). By getting new wheels, you might get by with a worn hub a bit longer. A somewhat temporary trick is to use a couple of pieces of shim stock from .001 to .003 inches thick, spaced around the hub to tighten up the splines. It is even possible to dress up the splines with a small file. But, these fixes just prolong the inevitable; sooner or later the rear hubs will have to be replaced if they have been run with loose wheels.

It makes good sense to take care of your wheels and hubs. If you don't, you will cripple your car... As a postscript, an aluminum can will do in a pinch to get you home if you spin a wheel. Use it for shim stock and the contents to soothe your pending expenditure.

Ron Phillips

La Habra Heights, CA

(The shims mentioned are for very temporary use only. Putting an old wheel on new splined hubs, (or a new wheel on old splined hubs, for that matter), will act to no advantage, since the old component will wear out the new component!-Ed.)

Steel Wheels

Most British sports cars came with pressed steel wheels as standard equipment. They ranged in width from 4" on the early cars to 6" on later models. Unfortunately, over the years these wheels have shown a tendency to crack between the bolt holes until the four holes eventually become connected with obvious disastrous results.

The principal source of trouble comes when vintage racers attempt to use wider later wheels for racing. First they try to move them outward with spacers about 1/4" thick. But, at that point, the standard wheel studs can no longer be used because they now don't protrude far enough to come out through the end of the lug nuts since the spacers are taking up 1/4" of the thread. In an effort to overcome this problem, a much smaller and thinner lug nut is substituted. but unfortunately, these smaller lug nuts do not have enough purchase on the wheel and can pull right through it under extreme conditions.

Now comes the street application. Over the years, our wheels, like any others go through a number of sudden, high-stress maneuvers. Over a period of time this high-stress flexing causes cracks in the center section around the bolt holes. A number of years ago I had accumulated ten or twelve Triumph wheels and decided to have them tested for cracks. Seven of them turned out to have identifiable cracks in the-centers!

These wheels can be made safer by cutting a 1/8" thick steel plate to match the outside diameter of the bolt pad, drilling with the appropriate holes and welding it to the back of the wheel. In addition, it doesn't hurt to weld the spider (the wheel center section) to the rim as well.

Unfortunately, for racing purposes, these are only "band-aids" and not cures. For street use, a little money spent on magnafluxing and reinforcing the wheel is good insurance. Finally, be sure to always use full-size lug nuts and be sure they are tightened to correct factory torque settings.

Too often, a racer has taken an unintended trip off the track and into the woods by virtue of a front wheel hub failure. Basically, these hubs failed by fracturing between the flange that holds the brake rotor and the flange holding the wheel.

Now the thrill of losing a wheel under racing conditions is merely the reason you can buy two pairs of pants with your fire suit, but such a thing could conceivably happen on the street as well. Street use naturally does not subject the hubs to the same loads experienced in racing, and you can protect yourself by having the hubs magnafluxed when you have them apart, a process that will reveal any cracks. For severe street use, it would probably be a good idea to shot-peen the hubs along with magnafluxing.

Racing, however, is another problem entirely. With the advent of softer, high-traction tires and the resultant higher cornering speeds achievable, anything but a NEW stock hub or an aftermarket alloy hub would be flirting with disaster. Unfortunately, new stock hubs are rare indeed, and the racing alloy versions are expensive. There does not appear to be a practical alternative right now, and safety should be the first consideration.

If there is no other practical solution to the use of used hubs, remember:

1. Clean everything and have the hubs magnafluxed.
2. If they are OK, have them shot-peened.
3. Re-check by magnafluxing about three times per season.

Ken Gillanders

Triumph Register of Southern California

RECOMMENDED TEST EQUIPMENT:

D.C. Moving Coil Voltmeter Scale 0-20V
Hydrometer

Note:

- 1. Test figures quoted are typical only
- 2. During testing, the engine should be cranked without starting:
Gas - Disconnect coil to distributor LT lead
Diesel - Operate engine stop control

TEST:	RESULT
-------	--------

1 HYDROMETER READING

Below 1.230
Recharge and then test
→ Test 2
1.230-1.290
→ Test 2

2 CONNECTIONS

Clean and tight
→ Test 3
Loose and/or dirty
Rectify
→ Test 3

3 BATTERY VOLTAGE, ON LOAD

If starter does not motor,
check solenoid operation,
cables, earth connections.
Rectify.
Should be approx.
Inertia 10.5v
Pre-Engaged 10.0v
→ Test 4
Below expected voltage,
check battery charge and
if low, re-test with good
battery
→ Test 4

4 VOLTAGE AT SOLENOID OPERATING TERMINAL

Should be:
Similar voltage to
previous test
→ Test 5
If voltage is lower than
in previous test, check
ignition/starter switch, all
cables and connections,
etc. Rectify.
→ Test 5
See also note below

Should be:
Within 0.5V of voltage in
test 3
→ Circuit
Satisfactory

Voltage more than 0.5V
below reading in test 3
→ Test 6

5 VOLTAGE AT STARTER, ON LOAD

Should be:
Approx. zero voltage
→ Test 8

If above 0.5V
→ Test 7

6 VOLTAGE DROP, INSULATED LINE

Should be:
Approx. zero voltage.
If shown, solenoid is sat-
isfactory and a fault exists
elsewhere in the circuit.
Check all insulated line
cables and connections.
Rectify.
Re-check as test 6
→ Test 8
If above 0.25 V, replace
solenoid
→ Test 8

7 VOLTAGE DROP, SOLENOID CONTACTS

Should be:
Approx. zero voltage.

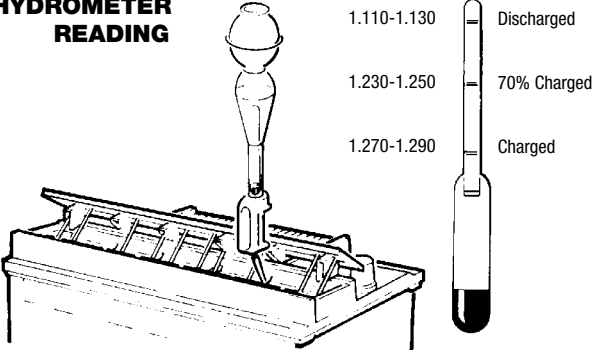

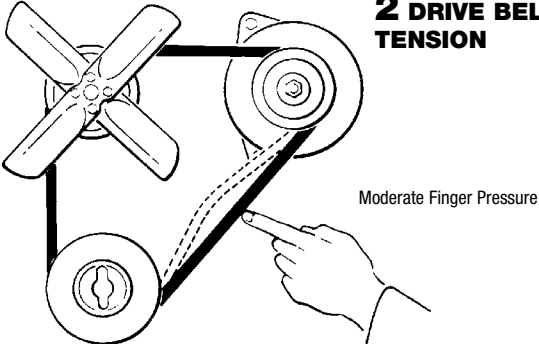

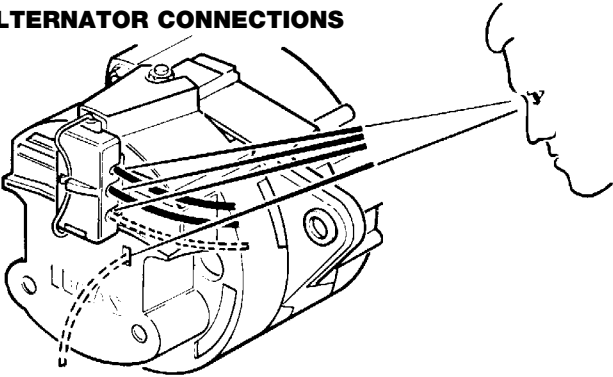

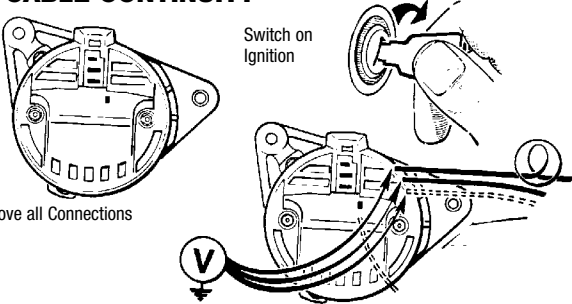

If above 0.25V, check all
earth connections includ-
ing chassis/engine bond-
ing strap.

8 VOLTAGE DROP, EARTH LINE

RECOMMENDED TEST EQUIPMENT:
D.C. Moving Coil Voltmeter Scale 0-20V
D.C. Moving Coil Ammeter Scale 5-0-100A

15/16 AC, 15/16/17/18/20/23/25 ACR Systems

Ron Phillips

La Habra Heights, CA

(The shims mentioned are for very temporary use only. Putting an old wheel on new splined hubs, (or a new wheel on old splined hubs, for that matter), will act to no advantage, since the old component will wear out the new component!-Ed.)

Diagnosing Wiring Troubles! (Words of Wisdom to Live and Drive By)

a multi-tester, horns that stop making funny gurgling noises and operate correctly when connected to the battery for a test.

Many electrical faults are caused by two frequently overlooked factors, either working separately, or together to produce a variety of interesting visual and sometimes pyrotechnic effects. The first of these factors is simply caused by age and the climate - electro-rheumatism if you like. The second is caused by that stalwart of the motoring world, Captain Accessory!

I am always surprised by the large number of good quality products on the market (and this does include radios, etc.) which are let down either by the cheap, easy-to-use connectors sold with the kit, or by "hash wiring" on the part of the installer. Fitting any accessory should be dealt with in the same way that any other task should be undertaken on a vehicle - properly. Connections should be mechanically and electrically sound. The worst electrical problems I have faced have been caused by "boded" wiring or faulty connections. Easy-to-use connectors often provide me with hours of entertainment, as does unwrapping electrical insulation tape to find wires that have been just cut, stripped back and twisted together. It always works for a while!

And it's not boded wiring - some products are of an appalling quality. For example, I have tried various different HT leads in my car to "improve the quality of the spark", "reduce resistance", and "provide better ignition". Most of these leads have been useless. It doesn't matter two hoots that the PTFE casing and superior quality copper core offers less resistance than the normal standard item - what matters is that if the cap doesn't fit the spark plug, it will just bounce off. One famous make had such appalling connections that it would not fit into the standard Lucas distributor.

If you are going to tackle any electrical work for your car, then do it properly and do it once. Throw away those cheap connectors and get the right tools to do the job properly - because I can guarantee that if you don't, that one day you'll wish you had - or even worse, you'll get rid of the car because it keeps going wrong. (I've picked up a few cheap cars like that which sing after two or three hours with a soldering iron!)

Get the Right Tools:
1. Soldering Iron - Get one with: 5 to 15 watts output, stay clean tips, decent stand, and PTFE leads (which make the iron easy to handle).
2. You probably already own one of those multi-purpose devices that cuts, strips wires and fits connectors. Throw it in the trash. Buy instead: Long Nose Pliers, Side Cutters, Wire Strippers, Insulation Tape, and Solder (60 - 40 lead/tin mix with flux incorporated).
3. Connectors - Get the type of connectors that are already in use on your car - spade connectors and bullet connectors (that can be soldered) and throw the crimp connectors into a bin!

Three important safety tips:

1. Disconnect the Battery
- A fully charged battery can use around 120 amps to turn over a cold car engine. Making a mistake and accidentally connecting the positive to the earth can have some interesting affects, i.e.:
 - i. Any wire involved in a direct connection will act like a fuse and melt (this includes HT wire).
 - ii. The battery could explode if an HT wire does not fuse quickly enough.
 - iii. 120 amps is enough to weld your screwdriver to any object very easily.

Does your car let you down every time you try to start it, or those wipers only work when it is not raining? Perhaps the indicators go dim every time you apply the brakes, and the horn only operates when the lights are off.

Before you go out to buy new lights, horns, switch gear, voltage rectifiers and anything else that carries an electrical current, it may be worthwhile spending time checking out the wiring rather than shelling out on new parts.

Quite often I have found that electrical components supposedly faulty, are perfectly all right, i.e., "blown" headlamps which are intact, switches that work when connected to

iv. You can receive nasty burns if you use yourself as a suitable earthing point. (Remember DC current differs from AC in that it does not change direction - once you get to grips with DC it won't let go!)

2. Holding the soldering iron

Never grab the soldering iron if it starts to fall. Sounds obvious, but there are still plenty of electrical engineers around who hold out their left hand when greeting somebody!

3. Suitable wiring

Finally, make sure that the wires you are using have the correct current capacity for the power they have to take. Using cable that is too thin is the electrical equivalent of reducing three lanes of motor way into one - total breakdown - if the current is much higher than the wire, the wire will act like a fuse and melt.

Making Connections

1. Spade connectors

Strip back 1/4" of wire without ripping out half of the strands, (if you have never used wire strippers before, have plenty of practice with some old bits of wire) twist the strands together and solder the bare end.

Always heat the wire with the soldering iron and apply the solder to the wire while it is still in contact with the iron. The wire must be hot enough for the solder to flow into the wire strands - but don't keep the iron there for too long, otherwise the outer sleeve of the wire will melt back. It is an art worth learning.

Do not apply solder to the iron and then try to "blob" the solder on to the wire - it never works because the solder "dries out" as the flux evaporates, and then the resulting joint can become brittle and prone to breaking (aka "Dry Joint").

Once cool, fit a spade connector sheath over the wire and then crimp the connector to the wire as shown in the diagram. The crimping makes a mechanically sound connection, but this is not enough. Returning to the soldering iron, you then need to apply heat to solder the wire to the connector to ensure an enduring connection, just like they do at the factory.

2. Bullet connectors

Bullet connectors are needed where (A) two separate lengths of wire are to be joined together or (B) where an extra wire is to be added to a main feed.

Many bullet connectors can be crimped on as well as soldered to enhance the quality of their connection, but the stock items used by BL tend to be a bit more tricky and can only be soldered - so you must ensure that the soldered connection is not dry!

Strip back 3/8" of cable and solder the strands. Insert in the end of the bullet - it may help to "kink" the strands slightly to keep the bullet in place - and then re-apply the soldering iron to the top of the bullet. Allow it to heat up and then apply the solder through the hole at the top of the bullet so that it can run inside, attaching the cable to the wall of the connector.

The advantage of these connectors is that, if corroded, the connector block can be thrown away and a new one fitted without having to do any more soldering. Also, they can provide multiple outlets for power, but watch out for that current overload on the original feed wire!

The disadvantage is that the connector is a mechanical fit and prone to electrical failure when corroded, which is why many cars start going wrong after five year's use!

An Extra Fuse Box

If you are accessory mad, the use of a fuse box with a direct link to the solenoid may provide a safe, efficient answer, rather than connecting countless new wires onto an overburdened wire feed.

Again, make sure that the wire, from the feed to the box has sufficient capacity to deal with any load place upon it (an in-line fuse may further protect the entire system).

Is it worth the effort you might ask? Yes! A clean job is a good job!

1. If it's soldered, then the connections will be better, stopping nagging electrical failures and dangerous burn-outs; the connectors are cheaper too.
2. The proper connectors often allow easier access for repair of equipment.
3. Stops wires from sparking and equipment lasts longer.
4. It looks better, too!

STANDARD TERMS AND CONDITIONS OF SALE & LIMITED WARRANTY

Last updated: March 17, 2018

PLEASE READ THE FOLLOWING CAREFULLY. By clicking the button "Agree," or otherwise accessing and using our website, and/or by placing an order with Moss Motors, Ltd. ("Moss," "we" "us" "our"), you acknowledge and represent that you are over 18 and have the legal capacity and authority to enter this Terms and Conditions/Warranty Agreement ("Terms"). These Terms constitute a binding agreement between Moss and you.

1. AGREEMENT TO TERMS AND PRIVACY POLICY

By accessing and continuing to use our Website (<http://mossmotors.com> "Website"), and/or by placing orders with Moss in any other manner, you are agreeing to these Terms including our Privacy Policy ("Privacy Policy", as found immediately following).

2. PRICE

It is Moss' intent that prices in our Catalogues and on our Website are accurate and up to date. However, prices are subject to change without notice. Please inquire about price at the time of purchase.

3. LIMITED WARRANTY

Moss is proud to provide one of the longest warranty in the business. Everything we sell is warranted to be free from defects in material and workmanship for 2 years from the date of invoice, with the exception of all superchargers, supercharger components, and supercharger hardware which carry a 1 year warranty. If the product warranted above fails, within the warranty period, Moss will, at its discretion, repair or replace the product. This warranty does not cover labor, failure of related components, normal wear of brake or clutch components or failure resulting from alteration, misuse, accidental damage, faulty installation, or faulty repair. TO THE FULL EXTENT PERMISSIBLE BY LAW, WE DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, OTHER THAN THOSE EXPRESSLY STATED HEREIN, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. If a product/part fails while under warranty, a warranty request should be submitted to Moss' sales department and must be supported by the original Moss purchase invoice, documentation of the failure and, upon request, return of the defective part.

4. LIMITATIONS OF LIABILITY

It is Moss' intent that the products sold, and services we provide, always function appropriately and no damages result. However, you understood and agree that any damage that may result is expressly limited (A) TO THE MAXIMUM EXTENT PERMITTED BY LAW MOSS, INCLUDING ITS AFFILIATES, EMPLOYEES, OFFICERS, DIRECTORS, CONSULTANTS AND AGENTS, WILL NOT BE LIABLE FOR ANY DIRECT,

INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGE, OR ANY OTHER DAMAGE, LOSS (INCLUDING LOSS OF PROFIT AND LOSS OF DATA), COSTS, EXPENSES AND PAYMENTS, EITHER IN TORT, CONTRACTUAL, OR IN ANY OTHER FORM OF LIABILITY, ARISING FROM, OR IN CONNECTION WITH (I) THE USE OF, OR THE INABILITY TO USE THE WEBSITE; (II) THE FAILURE OF A PRODUCT OR PART SOLD BY MOSS TO YOU; (III) THE INCORRECT INSTALLATION OF A PART/PRODUCT SOLD BY MOSS TO YOU; (IV) ANY FAILURE, ERROR, OR BREAKDOWN IN THE FUNCTION OF THE WEBSITE; AND/OR (V) ANY FAULT, OR ERROR MADE BY OUR STAFF OR ANYONE ACTING ON MOSS' BEHALF; (VI) THE UNAUTHORIZED ACCESS TO OR ALTERATION OF YOUR TRANSMISSIONS OR DATA; OR (VII) STATEMENTS OR CONDUCT OF ANY THIRD PARTY ON THE SERVICE; AND (B) IN NO EVENT SHALL THE AGGREGATE LIABILITY OF MOSS FOR ANY DAMAGES OR LOSSES IN CONNECTION WITH THE SALE OF PART(S)/PRODUCT(S) EXCEED THE TOTAL AMOUNT OF ANY AMOUNT PAID BY YOU FOR THE PART(S)/PRODUCT(S). MOSS MOTORS, LTD. DOES NOT WARRANT THAT ITS WEBSITE OR ANY OF ITS FUNCTIONS, INCLUDING ANY ELECTRONIC COMMUNICATIONS WHICH WE SEND TO YOU, WILL BE UNINTERRUPTED OR ERROR-FREE, THAT DEFECTS WILL BE CORRECTED, OR THAT THIS SITE AND THOSE COMMUNICATIONS, INCLUDING BULLETIN BOARDS, OR THE SERVERS THAT MAKE THESE SERVICES AVAILABLE, ARE FREE OF VIRUSES OR OTHER HARMFUL COMPONENTS. THESE SERVICES ARE MADE AVAILABLE TO YOU ON AN "AS IS" AND "AS AVAILABLE" BASIS AND YOU EXPRESSLY AGREE THAT YOUR USE OF THESE SERVICES IS AT YOUR SOLE RISK.

5. INSTALLATION NOT INCLUDED

Moss is not liable for injury or damage due to incorrect installation or use of their products/parts. All products/parts are sold with the understanding that the safe and proper installation and use of the products is the customer's responsibility. It is the customer's responsibility to check with their local laws to determine if the product they have purchased from Moss and then installed on their vehicle may or may not be legal. Follow factory workshop manual procedures and instructions, but use current shop safety standards and common sense. Some tasks will require professional advice which Moss does not provide.

6. MODIFICATION OF THESE TERMS

Moss reserves the right, at its discretion, to change these Terms at any time and/or to discontinue any part of the Website. A change to the Terms will be effective (a) ten days following Moss sending a notice to you; or (b) after Moss posts a revised agreement on the Website or in the Catalogue and you subsequently use the Website and/or order a part/product from us.

7. GOVERNING LAW/ VENUE FOR ACTIONS

By ordering parts/products from Moss you agree that (a) all claims arising out of or relating to the transaction will be governed by California Law; (b) all claims arising out of or relating to the transaction shall be brought and litigated exclusively in the Superior Court of the County of Santa Barbara (Anacapa Division), California, USA; and (c) you consent to personal jurisdiction in the previously mentioned court.

8. GENERAL LEGAL TERMS

If any provision, or part of a provision, of these Terms is held to be unenforceable, the rest of the Terms shall remain intact and be construed without the unenforceable such provision, or part of said provision. Moss may provide you with notices, including those regarding changes to the Terms, by email, regular mail, or postings on the Website and in the Catalogue. A waiver of any term or provision of these Terms will be effective only if Moss expressly states in a writing signed by an authorized representative that Moss is waiving that specified term or provision. These Terms and the Privacy Policy represent the complete agreement between you and Moss and supersede all prior agreements and representations related to the subject matter hereof.

PRIVACY POLICY

1. OUR COMMITMENT TO PRIVACY

This notice describes our Privacy Policy. Our privacy policy is designed to advise you about how we collect, use, and protect the personal information you provide. *By using our website or transacting business with us, you consent to the collection and use of your personal information as described in this Privacy Policy.*

2. WHAT INFORMATION IS COLLECTED

(a) Information You Provide To Us: We collect any information you enter on our site, or that you give us in any other way. You can choose not to provide certain information, but you may not be able to take advantage of our services and features. (b) Automatic Information: When you visit a website, you disclose certain information, such as your Internet Protocol (IP) address and the time of your visit. This site, like many other sites, records this basic information about visits to our site. (c) "Cookies": A cookie is a small piece of data that is sent to your browser or mobile device by websites, mobile apps, and advertisements that you access or use. This data is stored on your browser or mobile device and helps website and mobile apps to remember things about you to improve your experience with the website. Most browsers are set up to accept cookies, but you can change your settings to have your browser notify you when you receive a new cookie or to refuse to accept cookies. If you do not wish for cookies to be placed on your computer, most web browsers permit you to prevent that from taking place. However, please keep in mind that these technologies are an important part of how the website works; removing, rejecting or limit-

ing the use of cookies or other similar technologies might affect the availability and functionality of the website. To opt-out of receiving our direct mail or catalogs, you may send us an email at moss.sales@mossmotors.com or call us at 800-689-9313.

3. HOW AND WHEN THE INFORMATION IS USED

The information we collect is used for administering our business activities i.e., collecting your name, mailing address, credit card information, and e-mail address to allow for us to process and fulfill an order you place on our website. Occasionally we may use the information to notify you about changes to our website, new services, or special offers. If you wish to unsubscribe from our email list you may at any time.

4. HOW WE PROTECT YOUR INFORMATION

The privacy and protection of your information is important to us. We do not make any personal information available to third parties without your permission. Your access to some services and content is password protected. We advise that you do not disclose your password to anyone. In addition, we recommend you sign out of password-protected services at the end of your session.

5. WHO HAS ACCESS TO THE INFORMATION

Information about our users is important to us. We will not disclose individually identifiable information to any third party without first receiving that user's permission, except as necessary to fulfill your orders and support our marketing activities including direct mail, e-mail, database cleaning

and maintenance, and analysis. They have access to personal information needed to perform their functions, but may not use it for other purposes. We do not sell, rent or trade our customers' personal information to third parties. We may from time to time contract with third party vendors to provide ads to our customers on our behalf via the Internet or to send direct mail or catalogs to customers whom we think may be interested in our products or services. In order to do so, the vendor may collect anonymous information about your visits to our website using a "cookie". Third-party vendors may then pool the anonymous information that they collect from our website with other sources of information, which may include your name and mailing address, for purposes of determining whether you might be interested in receiving direct mail or a catalog.

6. METHODS WE USE TO PROTECT YOUR INFORMATION

We use security software to protect the confidentiality of your personal information. When you order from us, we offer a secure server. The secure server software (SSL) encrypts all the information you input before it is sent to us. Our system supports up to 128-bit encryption, one of the highest levels available.

7. CHANGES TO PRIVACY POLICY

If our Privacy Policy or procedures change, we will immediately post those changes to our website. Any such changes will be effective immediately upon being posted, unless otherwise stated in the change.

KENT STYLE WHEELS

The iconic "Kent" wheel is finally available once again! Now, there is no need to attempt to refinish a worn-out original. While there were several versions of the Kent wheel, this is the earlier one, and as many would argue - the most attractive one. It is mostly powder-coated polished alloy with just the lug-nut recesses painted dark grey. As fitted to late Series II XJ6, Series III X6, and early XJS, these beautifully finished wheels are supplied with a non-original plastic center cap. We recommend purchase of CAC9820/1, the original cap with a pre-installed emblem. Wheels are German TÜV approved.

Specifications:

- Design: *XJS*
- Color: *Anthracite/Diamond cut lip*
- Size: *6 in x 15 in*
- Bolt circle: *5 x 120, 65 mm*
- Offset: *35 mm*
- Centerbore: *73, 9 mm*
